Working on batteries:

- Switch the battery switch to „1“.
- Open the top cover, press and hold the green button „ON“.

Work in Ups Mode and recharge the batteries:

- Connect the power to the ~ 230V IN connector.
- Switch the battery switch to „1“.
- Open the top cover, press and hold the green button „ON“.
- Charging: battery indicator flashes.
- Charged: battery indicator light constant.

Overload

After exceeding the Permissible Load 2500VA the inverter will turn off.

To resume work, unplug the load and hold the green ON/OFF button twice.
